

# Rivers

To complete our unit on Rivers, I would like you to complete a double page spread or on A3 size paper.

In it, you must include a range of information covering the areas that we have studied as well as other facts or information that you have found out. You may include pictures or diagrams that are labelled to complement your work.

Areas to cover:

- + The water cycle
- + Significant rivers in the UK & the rest of the world
- + The key features of a river system
- + Explain the uses of rivers
- + Impact of damming rivers
- + Other interesting facts that you have found out.

I have also attached a set of fact cards that you may find useful.
